Synthetic fibers.

In view of the fact that there is almost no difference in the longitudinal appearance and the cross-section of synthetic fibers, the varying behavior of these fibers towards chemicals was used as a basis for the development of methods for the qualitative and quantitative identification of these fibers. These include microscopic recognition, determination of the melting point/heat resistance, chemical determination methods/solvents. (Author)

Reinhard, M.
CARTILAGE TUMORS OF THE LARYNX AND THEIR
TREATMENT (Die Knorpelgeschwülste des Kehlkopfes
und ihre Behandlung). [1962] 7p. (figs. refs. omitted).
Order from SLA \$1.10 62-20055

Trans. of HNO (Germany) 1960, v. 8, [no. 4]
p. 121-123.

DESCRIPTORS: *Cartilage, *Larynx, *Neoplasms,
Therapy, Surgery, Excision.

On the basis of general experiences surgical removal
of chondromas of the larynx should be done early.
Their growth and their development are incalculable
like the mixed tumors of the parotid gland. Their
radical removal is necessary, as proved in the 2 cases
which were studied.

(Biological Sciences--Pathology, TT, v. 9, no. 9)
